## Explanation of Simplified Accession Book

---

The accession book is a brief inventory of all volumes ever owned by a library and the entries being in the order of addition to the library it shows the chronological growth. It is the most permanent of all library records as there is no danger of losing or misplacing entries, and it is the final reference for doubtful points. Various valuable statistics may be secured from the accession record; how many volumes ever owned, how many added through purchase, how many through gift, how many discarded and an invoice through the cost column which gives the basis for insurance.

### Place of accessioning in the routine

Accessioning follows checking of bill, cost of each book having been written in inner margin of first recto (the right-hand page) after title page, with date of bill and dealer's surname.

### Order of entry

Enter one volume to a line and never under any circumstances give the same number to two volumes or to whole sets. No two books should have the same accession number even if the original is lost, sold, exchanged or condemned and an exact duplicate obtained.

### Date

The date used should be the date of bill, and if necessary to enter books of a later bill before an earlier one, do so, but never count off lines to allow space for the earlier bill. Use the short abbreviations for dates.

### Accession number

Write the accession number in the book in ink on the lower margin of the first recto after the title page, and it is a good practice to enter the number the first thing before any writing is done in the book, as it is sometimes omitted entirely if left for haphazard entry.

The accession number written on the book card and pocket helps in the identification of the book in the charging system and is especially desirable when no book numbers are used on the fiction.

**Withdrawn**

When a book is withdrawn, enter date and cause in the withdrawn column, to show the final disposition of the volume. A separate record kept in the Withdrawal Book shows the total number of books withdrawn from the library. The actual number of volumes in the library may be ascertained by subtracting the number of withdrawals from the total accession number.

**Remarks**

In the remarks column may be written any information desired not already provided for in the other columns.

**Ditto**

The ditto mark is a great time saver in accessioning long sets and may be used to advantage wherever possible. One ditto mark is sufficient in a column and the rows should be evenly kept.

*[Faint, illegible handwriting, likely bleed-through from the reverse side of the page.]*
